Education

01/2021 – Present **Doctor of Philosophy in Computer Science**, Johns Hopkins University, Baltimore, MD
01/2021 – Present **Master of Science in Computer Science**, Johns Hopkins University, Baltimore, MD
09/2019 – 12/2021 **Master of Science in Robotics**, Johns Hopkins University, Baltimore, MD | Grade Average 3.89/4.00
09/2015 – 06/2019 **Bachelor of Applied Science in Electrical Engineering, Minor in Computer Science**,
University of British Columbia, Kelowna, BC | 168 Earned Credits, Grade Average 90.7/100

Recent Publications

Projects

Intelligent Automation in Medical and Surgical Robotics | Python, ROS, C++

- Conducted theoretical modeling of automata in medical and surgical scenes.
- Developed libraries supporting the integration of the automata models to executable robotic systems [\[request demo\]](#)
- Identified and proposed research directions in end-to-end pipelines for automated tasks.

Robot [\[link\]](#) and AR [\[link\]](#) -Assisted Transcranial Magnetic Stimulation (TMS) | C++, Python, C#, Matlab, ROS, Unity, Vtk

- Completed a prototype of robotic TMS and used it for preliminary internal clinical trials and neuroscience studies.
- Developed neuro-navigation system for TMS targets planning and medical image viewing.
- Developed robotic systems and integrated [\[request demo\]](#) hardware with functional modules for Kuka LBR7 iiwa controlling [\[repo\]](#), hand-eye calibration [\[2,8\]](#), tool calibration [\[2\]](#), dynamics modeling [\[7\]](#), user interface, and networking [\[repo, repo\]](#).
- Developed AR systems [\[2,9\]](#) providing collision detection cues and capable of ergonomic planning and execution.
- Wrote academic publications [\[2,5,7-9\]](#) and patent applications, and presented in conferences.

Autokinetic Effect of Human Subjects [\[link\]](#) | C++, Python, 3D Slicer, ROS

- Developed subject testing systems [\[repos\]](#) and integrated hardware for functions including visual stimuli generation, eye tracking, hand tracking and data logging, with modules including user interface, and experiment workflow controller.
- Interacted with patients and healthy subjects in preliminary clinical trials. Recorded [\[demo\]](#) and analyzed data [\[request repo\]](#)
- Wrote a journal paper [\[6\]](#) and presented in Society for Neuroscience Conference 2023 [\[SfN23 page# 404\]](#) [\[request slides\]](#)

Robot [\[link\]](#) **and AR** [\[link\]](#) **-Assisted Femoroplasty** | C++, Python, C#, Unity 3D Slicer, ROS

- Improved hand-eye calibration results [\[8\]](#), and built a customized robotic manipulating system with AR capabilities [\[5,8,9\]](#).

3D Slicer Integration to Segment Anything Model [\[link\]](#) | 3D Slicer, Python

- Open-sourced the first SAM-based medical image segmentation tool [\[repo\]\[3,10\]](#).

AR-Assisted Orbital Floor Reconstruction [\[link\]](#) | C#, Unity

- Developed an AR system for orbital floor reconstruction surgery involving functions of medical image registration, accuracy validation, implant shape generation, and intra-operative navigation. Deployed the system on Microsoft HoloLens.
- Collaborated with surgeons and shadowed surgeries for prototyping. Wrote a publication and presented in conference [\[1\]](#).

Applications of Machine Learning Methods | Python, Keras

- Helped as an undergraduate assistant for experimentations of machine learning methods in various projects including geo-magnetic data reconstruction, real estate appraisal, and pipe performance management.
- Developed a binary classifier for pulsed eddy current analysis in metallic structures and published a journal article [\[Google Scholar\]](#).

Biomass Derived Carbon Cathode in Lithium Batteries [\[Google Scholar\]](#) | Chemical preparation, Battery assembly, Battery performance characterization

Research

09/2020 – Present	Graduate Research Assistant , Medical automation, robotics and augmented reality (AR) research [2-3,5,7-10] , Prof. Mehran Armand, BIGSS and LCSR , JHU
09/2020 – Present	Trainee, Departments of Neurology and Neuroscience , Studies of balance, vestibular migraine, and perception of motion (autokinetic effect) [6] , VOR Lab , JH Medicine
05/2020 – 12/2020	Graduate Research Assistant , Augmented reality assisted craniofacial surgery [1] , Prof. Peter Kazanzides, SMARTS , JHU
05/2019 – 08/2019	Student Intern – Algorithm , Vision-based pose estimation, Rokae Robotics Technology
05/2017 – 04/2018	Undergraduate Research Assistant, Biomass-derived carbon cathode in lithium batteries [Google Scholar] , Prof. Jian Liu, NESC , UBC
10/2016 – 08/2017	Undergraduate Research Assistant , Various applications using machine learning methods [Google Scholar] , Prof. Zheng Liu, ISDP , UBC

Teaching

01/2022 – 05/2024	Teaching/Course Assistant , EN.601.453/454/653/654 Introduction to Augmented Reality / Applications of Augmented Reality / Augmented Reality, Prof. Alejandro Martin-Gomez, Prof. Nassir Navab, Prof. Ehsan Azimi, JHU <ul style="list-style-type: none"> ○ Mentored over 40 augmented reality projects and 120 students [student demos].
-------------------	---

- Prepared class materials, developed teaching demonstration apps, held office hours, graded and designed assignments, and obtained high scores on evaluations 3 terms and counting.
 - Received the University Excellence in Teaching Award.
- 09/2021 – 12/2021 **Teaching Assistant**, EN.535.630 Kinematics & Dynamics of Robots, Prof. Mehran Armand, JHU
- 09/2020 – 12/2020 **Course Assistant**, EN.601.455 Computer-Integrated Surgery I, Prof. Russell H. Taylor, JHU
- 09/2019 – 12/2019 **Teaching Assistant**, EN.530.641 Statistical Learning for Engineers, Prof. Jin Seob Kim, JHU

Community Services

- 09/2023 – present Volunteer Developer, Tuberculosis Loss Predictor, JHU Non-profit
- Developing the user interface for an application for clinical use, targeting the tuberculosis risk prediction in South Africa
- 09/2023 – present Volunteer Developer, VectorCam, JHU Non-profit
- Developing the user interface for an application targeting the recognition of the vectors of malaria used in areas in Africa, Southeast East Asia, and Middle and South America
- 09/2022 – present Communication Officer, Graduate Student Association, LCSR, JHU
- Representing the students in LCSR, the robotics research cluster of JHU consists of 200+ students and 40+ faculty members throughout departments and campuses.
- 12/2023 – present Founder, Let's Code Club
- Helping graduate students prepare for technical interviews in tech companies.
 - Holding mock interviews and providing feedback.
- 04/2023 [Invited Talk](#): How good is SAM in medical images?, [SPARK Academy](#), McGill University
- 11/2018 – 06/2019 Founder, RoboMaster Club, UBC
- Founded the club for students who are interested in building robots for DJI's RoboMaster Competition, and developed the fund-raising, schedule, and internal documentations. Was in charge of recruitment, sponsorship seeking, and organization coordination.

Awards

- 2024 Joel Dean Excellence in Teaching Award
- 2024 International Conference on Robotics and Automation Competitive Travel Grant
- 2019 Graduate with Distinction
- 2018 International Undergraduate Research Award
- 2018 Deputy Vice-Chancellor Scholarship
- 2017 Deputy Vice-Chancellor Scholarship
- 2017 International Student Faculty Award
- 2015 - 2019 Dean's Honor List
